

Fundamentals of Sustainable Design & Construction

Saturday, October 6, 2007

2:00pm-5:00pm

Voyager Montessori Elementary School Campus

8225 NE High School Rd.

Bainbridge Island, WA

We play a significant role in climate change, and it's time to reverse this trend. As homeowners, we can make a difference by increasing the energy efficiency of our homes and reducing our reliance on building materials that affect both our indoor *and* outdoor air quality.

Attend this three-hour presentation and discover the ins and outs of designing and building residential environments in an earth friendly manner.

Here you will learn:

- The four environmental R's of residential designing and building
- How to buy/sell/donate recycled building materials
- Energy saving tips that will also save you money
- How to improve your homes indoor air quality

Additionally:

- You will be provided with an extensive list of resources for accomplishing your green design and build goals
- The *Environmental Home Center* will be on hand exhibiting sustainable and recycled content building products

Presenter: Molly Erin McCabe, AKBD, is a professional kitchen and bath designer based on Bainbridge Island. She is the co-designer

and co-builder of a three star home. Ms. McCabe is a member of the Built Green Council of the Kitsap Home Builders Association and a Board member of the Olympic West Sound Chapter of the National Kitchen and Bath Association.
